Visit one of México's most important, biodiverse, and strikingly beautiful Protected Areas. Snorkel with the valley's diverse endemic fishes in warm, crystal clear desert springs and enjoy the meeting's diverse social events in this visitor-friendly small town. Getting there is easy via the meeting's van pools from airports in Austin and San Antonio, Texas. Meeting papers (with simultaneous wireless translation) include a special symposium on desert aquatic habitat restoration and general sessions on desert fishes and their habitats. Details at http://desertfishes.org/meetings/2008/call_2008.html.
